Serving the People of Uganda!

Pastor Deo Mwanje's mission statement says "doing what we can with what we have." And that really describes the heart of Deo Ministries. The slum of Kosovo is truly a slum—poverty stricken, located in the low lying areas of the city. In the rainy season all that water runs into the low lying areas and hence flooding is a constant problem. Water channels overflow, houses are flooded and people here sleep on the floors of their houses for the most part. Everything is muddy to say the least.

Deo Ministries, the school and the church are the only really safe places in this community. We count it a privilege to be able to stand alongside this ministry and help where we can.

had to tear down another building. Suffice it to say it's a long story.

But I am happy to report that the project is finished! The

new water channel is completed and the new wall is built to enclose and ensure the safety of the children!

God blessed us with a financial gift and we were able to direct the funds to fix the bricks of the

school building by putting stonework down the entire side of the building and repair the gate at the entrance to the school.

Little by little the school compound is being beautified. We're so glad to be able to be a part of this awesome work.

We are planning to take a team with us in April 2019.

If you would like to come along and see the work first hand we would love to have you join us. We will be

working with the children of Treasured Kids Primary School and hopefully doing another project to help continue making progress. Thank you again for your prayer and financial support!

Love and Blessings!

Ross & Jennifer

The water channel is on the other side of this new wall

compound and ran up against the side of one of the school buildings, structurally weakening it. So Deo's task was to build a water channel that directed the water to the back of the property and into an existing water way through the community. In order to do that he
